

- Python常用包的导入

```
1 # 画图包
2 import matplotlib.pyplot as plt
3 # 使产生的图像内嵌在jupyter notebook中, 不跳出单独的窗口
4 %matplotlib inline

1 # 数字包?
2 import numpy as np
3 # 用来导入数据, 如CSV file (comma-separated-values)
4 import pandas as pd
5 # 有一些测试数据和模型
6 from sklearn import datasets, linear_model, preprocessing
7 # 导入matlab数据
8 import scipy.io
9 mat_dict = scipy.io.loadmat('StevensonV2.mat')
10 # 多项式
11 import numpy.polynomial.polynomial as poly
```
